

MELBOURNE  
PATHOLOGY

Quality is in our DNA

## Introducing eCollect - an Australian first

eCollect is a sophisticated new program specifically developed for Melbourne Pathology and our patients.

### What is eCollect?

eCollect allows our collector to enter your details directly into our medical record system, and print a label for each tube or specimen pot.

Registering your details for the first time may take a little longer, so we appreciate your patience.

### Your patient ID card

The good news is that you will be issued a Melbourne Pathology patient ID card and on future visits we will simply scan the barcode to fill in your details. However we will always check your details with you at every visit to make sure they are up to date. This is a critical part of the process to ensure your specimen is registered in your name.

Capturing all the information about your pathology test directly into our system at the time you are with us, is the safest and easiest way to keep track of your tests as they travel through the many specialist areas of our laboratory. As many as 25 people may be involved in your testing process, including your collector, couriers, scientists and pathologists.

### Benefits of the patient ID card

- Additional security of identification
- Safe and secure collection of your details
- Faster results to your doctor

*Thank you for choosing Melbourne Pathology.*
